Most recent Professional Experience

Paarfit UG Munich Germany   September 2019 - Present
Full Stack Web Dev. & IOS App

- It was my responsibility to develop the Front-End and the Back-End within the munich startup Paarfit Ug. This included management of the company's software solution and involvement in the entire development lifecycle of their product.
- Designing and building the Front-End using **Javascript** framework **React Js** and the Css framework **Tailwind Css**.
- Maintain and develop the Back-End with **Node Js**, **Strapi** and **Mongo Db** as Database.
- Ios App developement using **Flutter**

Safeat UG Munich Germany   Juli 2020 - Present
Full Stack Web Dev. for a Progressiv Web App

- Develop the Front-End and the Back-End. This included management of the company's software solution and involvement in the entire development lifecycle of their product.
- Design and build the entire Front-End using the modern **Javascript** framework **Vue Js**. The challenge here was to deliver responsive, cross browser compatible and accessibility complient components.
- Maintain and develop the Back-End using **Node Js**, **Express** and **Mongo Db**.
- **Dockerize** the Web App and automate the software delivery process using **CI/CD pipeline Jenkins**.

Rohde & Schwarz Munich   October 2018 - March 2020
Cloud Engineer

- Development of the Rohde & Schwarz cloud infrastructure. Collaborate as part of larger delivery teams which include project managers, business analysts, architects, developers, and change management professionals.
- Work with strategic customers as an advisory architect and developer on engineering solutions of significant scale/volume/complexity on **Azure**.
- Maintain and develop **Kubernetes Operators** using **Go Lang** and **Terraform**.
- Setting up containerization software **OpenShift** developed by Red Hat.
- Performance Management - Monitor and tune system to achieve optimum performance levels, and provide reports to support metrics collection using **Grafana.**
